Hints and Tips for Photographers

Sections: When you are deciding which section to enter your print in, it may help to ask yourself the following questions; "What is the dominant feature in the photo?" and "Does that feature fit with the title of the section?". For example, Waterscape - is the water the dominant feature, or a lesser part of the photo? If it is a lesser part of the photo, perhaps there is another section the print would be better suited in.

Mounting: You can achieve your best result if your photo is mounted on a thick paper or light cardboard with a double sided tape or something similar. Gluing prints onto paper tends to curl both the photo and the mount. (If you prefer to use a picture mat that is fine to just be aware we may need to put a pin hole through the mount to display them.)
